Forecast for Monday 18 Dec 2023

Weather: Low cloud and patchy drizzle in the early hours largely confined to Knoydart and Glen Shiel, with some clear spells further north. Most ranges turning cloudy in the morning with light rain or drizzle more widespread, although Assynt and far north dry and brighter. Brightening up for a couple of hours in the afternoon, but cloud thickens and lowers again towards dusk with a brief spell of rain and summit snow. Becoming dry again with clear spells in the evening.

Chance of cloud-free hill tops above 800m: 10% or less in the morning. 30% in the afternoon, best chance across the Caithness hills.

Low cloud and visibility: Generally very poor visibility, cloud mostly persistent with bases above 500m in the west, 700m in the east, perhaps rising to 900m across Caithness hills in the afternoon. Cloud largely breaking up in the evening.

Met Office Aberdeen Meteorologist's View

Winds may be around 10 mph stronger than in the table across the higher summits in the morning. Note freezing levels remaining well above the summits across hills south of Torridon and the Fannichs until midday.

Forecast for Tuesday 19 Dec 2023

Weather: Patchy cloud increases in the early hours. A band of heavy rain, snow above 600-700m, sweeps east around dawn. Then frequent occasionally heavy showers, falling as snow above 600m in the north, 700m in the south. Showers may merge to more continuous rain, snow above 600m at the start of the night. Severe summit gales.

Maximum wind: Westerly 40 gusting 50 to 60 mph.

Chance of cloud-free hill tops above 800m: 30%

Low cloud and visibility: Variable visibility and cloud bases. Cloud often around 1000m, but frequently lowering to 600m as showers pass through. Visibility good outside of low cloud, but reducing to a few km or less in showers.

Temperature: **Glens:** Plus 4 or 5 Celsius.
At 800m: Around zero Celsius.
Freezing level: 800-900m.
